

SAFETY CERTIFICATE

VOC/FORMALDEHYDE EMISSIONS

The emission of formaldehyde is an important factor in the evaluation of the environmental and health effects of wood-based board materials. The Wild River Timber range has been tested for formaldehyde emission and is significantly below the required standard. Test results are available on request (Record No: 06-462B /AP 1426/015/06) (Test: EN 717-1).

FIRE RATING

The Wild River Timber range of flooring has been tested to the highest standards and meets all critical radiant flux requirements. Test results are available on request (Test: AS/NZS 3837-1998).
