SISAL

PRODUCT NAME

ARREDO

Collection	Artisan Sisal Collection
Usage	Indoor Residential
Pile fibre	Sisal
Backing	Latex
Construction	Woven
Thickness	6-7 mm

Sisal is a durable and sustainable fibre, organically textured and elegant in appearance, it will stand the test of time if it is cared for properly and receives a periodic and tailored maintenance programme.

Installation:

Please refer to Artisan Sisal Installation Guide

Recommended Protection:

Microseal protection is a multi-dimensional product designed to protect fibres from stains and damaging UVA and UVB rays. Microseal penetrates the fibre by means of nanotechnology, maintaining the appearance and texture of the fibre. Applying Microseal will not guarantee that your natural fibre will never stain but it will reduce the chances should a spill occur. Microseal is available on request, and can be applied either at installation, manufacturing stage or at a later date. However, we do recommend applying it prior to use of your natural flooring

Warranty:

Please refer to Artisan's warranty guide

Maintenance:

Please refer to Artisan Sisal Care & Maintenance. Seek professional advice as required
