

Horizon Monobloc

The Horizon Monobloc is elegantly engineered using European technology and styling. Providing robust protection from the elements, it allows you to merge indoor living with the outdoors

Made with quality aluminium and stainless steel, the Horizon Monobloc is easily operated manually or automated with the press of a button. When automated, a wind or motion sensor can be added to retract the awning during high-impact conditions. An aluminium hood can also be included for a streamlined protected finish. The Horizon Monobloc comes with a five-year warranty and has undergone rigorous testing to ensure it withstands extreme conditions. Through sophisticated design and technology, our products make the most of living, without the need to build or renovate.
